**Responsibilities of
Platform**

Responsibilities of Platform

1. policy study

- VSS study work in related policy
- follow the discussion in WTO/SPS and TBT, support MOFCOM and AQSIQ in VSS standardization topic

2. industry investigation and standards comparative analysis

- support industry, especially SMEs participation in VSS activities. Provide professional service for them.

3. capacity building service

- establish a national dialogue of VSS, with promotion and capacity building projects
- hold workshops to raise the awareness of public and private stakeholders

Responsibilities of Platform

4. information service and communication

- establish a cooperation with ITC. we suppose to provide a VSS data service to local stakeholders, with analysis consultation, and collect best practice for sharing
- build the relationship with other developing countries' VSS national platforms, sharing experiences and information

5. cooperation with UNFSS

- as the partner of UNFSS in China, we work with UNFSS and its five agencies. We will keep the close relationship with UNFSS and follow its activities, and support the stakeholders to participate in the activities on VSS.
