## NOTIFICATION

### *Addendum*

The following communication, dated 12 February 2014, is being circulated at the request of the delegation of the United States of America.

---

TITLE: Energy Conservation Program: Energy Conservation Standards for Metal Halide Lamp Fixtures

AGENCY: Office of Energy Efficiency and Renewable Energy, Department of Energy

ACTION: Final rule

SUMMARY: The Energy Policy and Conservation Act of 1975 (EPCA), as amended, prescribes energy conservation standards for various consumer products and certain commercial and industrial equipment, including metal halide lamp fixtures (MHLFs). EPCA also requires the U.S. Department of Energy (DOE) to determine whether more-stringent standards would be technologically feasible and economically justified, and would save a significant amount of energy. In this final rule, DOE is adopting more-stringent energy conservation standards for MHLFs. It has determined that the new and amended energy conservation standards for this equipment would result in significant conservation of energy, and are technologically feasible and economically justified.

DATES: The effective date of this rule is 11 April 2014. Compliance with the new and amended standards established for MHLFs in today's final rule is required by 10 February 2017.

The incorporation by reference of certain publications listed in this rule is approved by the Director of the Federal Register on 11 April 2014.
